

OFFSHORE WARRIORS, INC.

About Offshore Warriors

Offshore Warriors, Inc. is a one of a kind company headquartered in Lafayette, Louisiana dedicated and determined to provide the best solutions and services to the Oilfield Industry. Moving with technology, and assessing the 'Future' needs and acting upon those in the 'Present' has been a motive at Offshore Warriors, and thus we, at Offshore Warriors, say the "**Future is Now**".

Combining 35 years of experience with the latest technology and encapsulating this with well-established management procedures has resulted in successful relationships with our clients. We are proud to say that we have some of the major Oilfield giants on our Client list.

The services provided by Offshore Warriors, Inc. to various companies/vendors associated with the Oil & Gas Industry include :

- Field Personnel
- Inventory Control & Tracking
- Trucking & Marine Logistics
- Computer Hardware Solutions
- IT Solutions
- Safety Training
- Equipment Rental and many more

With years of experience and research in the field, Offshore Warriors, Inc. has produced its flagship of products/ solutions, **Shorebase Command**, **Central Dispatch**, and **Marine Management** to track materials/inventory, provide trucking and marine logistics, and generate custom reports and invoices for the Oilfield Industry. These software solutions are better than any Inventory Control and Tracking software available, as these have been tailored to the demands and needs of the oil industry while keeping the applications tailored to the users who perform the data entry

Shorebase and Offshore Logistics

Offshore Warriors has the ability to efficiently manage and handle any operation in the oilfield. Our Personnel (Dispatchers, Offshore Clerks, Consulting Engineers, and Drilling Consultants) consists of experts with years of experience in the field. We are very selective when it comes to having field personnel on-board. They can easily and efficiently ensure the smooth operation of any oilfield job from the beginning till its completion. These personnel use Shorebase Command; the company developed custom Inventory Tracking software, to track materials/logistics inventory, and generate reports for their status, movement and use, in addition to other logistical information such as events logs, fuel soundings, Barge tracking, trucking expense reports and more....

Trucking Logistics

Offshore Warriors has a dedicated Central Dispatch division. Our trained staff deals with various trucking companies and truck managers to monitor each run between the shorebase and vendor locations. Our trucking personnel are equipped with the company's custom developed Central Dispatch software that

enables efficient and

coordinated trucking operations throughout your job.

Marine Logistics

Offshore Warriors has experience in fulfilling various marine needs of its clients. Having maintained successful relationships with various boat companies, we help you find the best vessel for your operation. Through our custom software, developed specifically for the marine division, clients can track boat movements, record logs, generate reports, and ensure accurate accounts for your marine operation.

IT Support & Software Solutions

This division, named *Warrior Tech*, is the most vital resource of our company. It offers unending support & commitment, and has the ability to handle any technical issue (software or hardware). We have a dedicated team of Programmers, IT & Field Technicians. Our programming team strives to provide the best software solutions to the Oil and Gas industry that improves user experience and efficiency. Warrior Tech also offers a host of other services such as: Providing Server Backups, Hosting e-mail Servers, Implementing VOIP Solutions, Designing and Maintaining Networks.
